## Fairphone Announces the Refurbished Fairphone Gen. 6

***"The perfect trifecta":** The refurbished Gen. 6 is the ultimate value proposition for the conscious consumer: the already most sustainable choice, combined with a rigorously refurbished phone, all at a lower price for the exact same fantastic device*

**AMSTERDAM, June 4, 2026** Fairphone continues to lead the electronics industry in sustainability by announcing the refurbished Gen.6 - its highly praised, award-winning smartphone. By choosing refurbished, consumers gain access to the same modular, repairable technology at a more accessible price point.

Raymond van Eck, CEO, Fairphone: "Extending the lifespan of technology is one of the most effective ways to reduce its environmental impact, and we are determined to lead by example."

### What is a Refurbished Fairphone?

A refurbished smartphone is a preowned device that has been professionally restored to like new condition. Refurbished devices function exactly the same as a brand new design, sporting the exact same tech specs and modularity, with only slight cosmetic wear and tear.

To ensure optimal performance, every refurbished Fairphone (Gen. 6) undergoes a strict restoration process:

- Rigorous quality checks: Every device is exhaustively tested and certified.

# fairphone

- Component replacements: Batteries are swapped out if capacity falls below 85%. Displays are replaced if they have more than two scratches. Mid frames and back covers are also replaced if they exhibit deep, visible scratches.
- Fresh software: All models are completely wiped and updated to the latest available Android version, providing a clean, secure start just like a new device.
- Guaranteed protection: Refurbished devices include a 14 day return period and the same iconic 5 year warranty coverage, with software updates going all the way to 2033 - all for just €499/£439, approx. 10% lower than a brand-new device.

## Why Choose Refurbished?

Choosing a refurbished Fairphone helps reduce electronic waste and prevents unnecessary resource extraction and manufacturing. Because the device has already been in use, it carries a significantly smaller carbon footprint compared to a newly manufactured phone. It is the ultimate environmentally friendly choice, one that is both kind to the planet and easier on your wallet.

Availability - the refurbished Gen. 6 is available on Fairphone's [website](#) starting today for just €499/£439.
